GLOBAL NETWORK SYSTEMS, INC.

Global Network Systems (GNS) provides IT consulting, computer hardware, and networking hardware to medical practices.

- Certified Network and Software Engineers
- Billing and reimbursement expertise
- In-house Billing Services organization

Customers solutions range from securing their first Internet connection to information requirements that include complex, secure interfaces to other offices or hospitals.

PhotoCapture Need

- Problem:
 - Red Flag compliance
 - Currently no photo ID capture solution offered by GE to satisfy Red Flag rule in *Centricity Group Management*
 - If patient photo resides in clinical system (*AHS Enterprise EHR*) front desk workflow is cumbersome (toggling between systems)
- Need:
 - A simplified patient picture workflow that is Red Flag compliant

The PhotoCapture Solution

Validate patient identification and be
Red Flag compliant

Capture patient photo ID within *Group Management*

Store/Retrieve patient photo ID in one place
(*Group Management* or *AHS Enterprise EHR*)

Update patient photo ID, as needed

PhotoCapture: Be Red Flag Compliant

Product Demonstration

- **Workflows**
 - **New Patient:** Patient presents at front desk. Front Desk person chooses the patient from the schedule. No picture is shown in Group Management, so picture is taken and stored.
 - **Existing Patient:** Patient presents at front desk. Front Desk person chooses the patient from the schedule. Picture is shown in Group Management. Front Desk person validates that the picture is recent and updates picture, if necessary
